Weather Key Points

Regional Operations Center

Western Region

Monday, August 29

- A significant warming trend is expected for this week, with moderate to locally high heat impacts developing across most interior locations through much of the work week, and then increasing to high to locally very high heat concerns heading into the weekend
 - Some daily record high temperatures are possible for the latter half of the week
 - High heat impacts will also spread into portions of coastal Southern California over the upcoming weekend
- Isolated showers and thunderstorms are possible across the northern Sierra on Monday; otherwise, dry weather is expected across the state through much of the week
 - A few storms could return to interior Southern Region late in the week, but confidence in this possibility is currently low
- Elevated fire weather conditions are expected across some mountain and foothill locations across the state each afternoon through the week, as winds remain locally breezy
